

# GDPR ToolBox for CRM-Microsoft Dynamics 365

We support you in the implementation of your GDPR requirements

## Overview

The GDPR ToolBox for CRM-Microsoft Dynamics 365 supports you in meeting the GDPR requirements in terms of documentation and reporting of your CRM-Microsoft Dynamics 365 processes - such as identifying personal data, classifying entities, generating and processing deletion and anonymization proposals.

Respond within the legal deadline to requests from data subjects, for example - document them, export and send the personal data from CRM-Microsoft Dynamics 365 if required.

## Key-Features

- Documentation of CRM data structures for personal data
- Assignment of data origins, declarations of consent and processing purposes
- Documentation of requests from data subjects, such as the obligation to provide information, requests for deletion, request for restriction or data correction
- Implementation of the duty to provide information via HTML page including mail dispatch, restriction of use, deletion request and request for porting own data (data export)
- Deletion and anonymization periods for the creation of structured data
- Automatic or manual postponement of deletion and anonymization periods with the deposit of reasons
- Deletion and anonymization suggestions for pending data
