# KatarGo BI

ERP Software and Business Intelligence Solution combined

KatarGo BI is a comprehensive Business Intelligence system for KatarGo, the ERP industry solution for shipping and wholesale. The solution accesses KatarGo's source data, collects it, and prepares it so that you can quickly and easily retrieve it via Microsoft Power BI or the TARGIT Decision Suite.

From the CEO, senior employees, or staff – the application does not require specialized knowledge to create complex reportings. KatarGo BI already includes predefined dashboards, sales analyses, dimensions, and metrics in the standard version, which deliver the facts and results you need at the click of a mouse
