2.2	Events (Only from BC190).....	2
2.3	Performance by Table Extension Keys (Only from BC190)	2

1. Introduction

These Release Notes describe the changes for version 1.29 of the GDPR-Toolbox based on version Business Central 14.

2. Features

2.1 Scheduled Actions Creation when Deleting/Anonymizing (Only from BC190)

When records from a data structure are processed using the Delete/Anonymize button and no Scheduled Action exists, it will be created during the transaction.

2.2 Events (Only from BC190)

New event OnBeforeWriteTable in Data Structure Management.

2.3 Performance by Table Extension Keys (Only from BC190)

To improve performance, additional keys have been created. These are adapted to the standard data structure. The performance check can be viewed via GDPR Toolbox Setup -> Actions -> Performance.
